SAQ-Paper II

GROUP-A

Abdomen

Stomach

1. How stomach bed is formed? **(CMU:** Nov-22, May-21, 20, 19) (Ja-13,14, Nov-17, 18) Draw & level the stomach bed. **(May-25)** Mention the blood supply **(CMU:** May-20) (Nov-18, Ja-14, May-15, Ju-15) & Lymphatic drainage of stomach. **(CMU:** Nov-21) (Ju-14, May-15, 16, 17, 19) What are the radiological importance's of the duodenal cap? (Ja-06, 11, 12, 14, Ju-10,11, Ju-15)
2. **Short note**- Gastric canal **(CMU:**Nov-23) (Ja-08)
3. Name the common site of gastric ulcer and the reason behind it. (Ja-05, Nov-15)
4. What is rectus sheath and how it formed at the level, just an inch of above umbilicus **(CMU:** May-20) (use diagram). (Ju-14) from development background (May-17)
5. Write down the developmental rotation of stomach ? (May-17)
6. How stomach can divided into various parts? **(CMU:** May-20, 19) (Nov.17)
7. Explain Anatomically why gastric ulcer is common in lesser curvature. **(Nov-25)** (May-19)
8. Action of vagus nerve on stomach. **(CMU:** Nov-21)
9. Mention the arterial supply of greater curvature of stomach. **(CMU:** Nov-22)
10. Explain how rotation of stomach changes the position of nerve. **(May-25)**
11. Name the structure present in the right free margin of lesser omentum. **(May-25)**
12. Draw the level te parts of stomach. **(Nov-25)**
13. Write the contents and importance of great omentum. **(May-25)**

Small &Large intestine

1. Write down the blood supply of duodenum from development background **(CMU:** May-21) (May-17, Ja-15, Ja-16) Give the relation of 1st, 2nd and 3rd part of duodenum. (Ju-05, 06, Ja-09).
2. Why 1st Part of duodenum is common site of ulcer? (Ja-14)
3. Mention the morphological features of large intestine. **(CMU:** Nov-20, May-19) (Ju-10, Ja-12, 14, May-15, Ju-15) Cardinal feature of large gut; **(CMU:** Nov-24, 23,22)
4. Write down the interior of 2nd part of duodenum. **(CUM:** Nov-23) (Ju-15). Histology of large gut. (Ja-06, Ju-05,06,12, 13)
5. Compare a piece of large gut with that of the small gut seen under microscope by 4 points. **(CMU:** May-24)
6. Give the difference between large and small intestine? **(Nov-25) (CMU:**May-19) (Ju-07, Ja-13,15, May-19)
7. How surface area of absorption of small intestine is increased. (Ja-13) Draw & label intestinal villus.
8. Explain physiological Herniation of gut? (May-15)
9. **S/N:** i) The mesentery. ii) Duodenal cap (May-15)
   iii) Payer's Patch (May-16) (iv) Physiological herniation of gut. **(CMU:**May-20)
10. Artery supply of Transverse colon on development background. **(Nov-25,** 16) **(CMU:** Nov-20, May-19)
11. Difference between jejunum & illeum. **(CMU:**May-20) What is hemorrhoid. (Nov-16)
12. Draw & label the histological structure of duodenum **(CMU:**May-19) What is hirschsprung disease **(CMU:** May-24, Nov-24)
13. What is Mackel's diverticulum **(CMU:** May-24, 19, Nov-22)
14. Name the common position & artery supply of vermiform appendix. What is aganglionic megacolon. **(CMU:** Nov-22, May-20)
15. Histological feature if illum (diagram) **(CMU:** Nov-22, 21)
16. Write the embryological basis of congenital megacolun. **(Nov-25)**

CamScanner

Urinary System, Rectum & Anal Canal

1. **Short notes:**
   a) Mickel's diverticulum (Ja-05,15, Ju-13, Ja-16, May-19)
   b) Level of constriction of ureter. **(Nov-25)** (Ja-13, 14, May-15) with bony level **(CMU:** Nov-24,May-23)
   with importance **(Nov-25) (CMU:** Nov-21, May-19)
   c) Hemorrhoid (Ja-15)
   d) Automatic bladder. (Nov-15, 16, May-16, 18) e)Ureter (May-19)
2. Describe the interior of anal canal (May-18).
3. Mention the lining epithelium of anal canal on Development background. (Nov-15)
4. Write down the nerve supply of urinary bladder (Nov-17). Urinary tract infection is common in female- explain. **(Nov-25)** (Ja-15, Nov-15, Ja-16, Nov-18)
5. An infant has foul smelling umbilical Discharge- make explanation (May-15)
6. Draw and level histological structure of urinary bladder. **(CMU:**Nov-21)
7. Write down the level of ureteric constriction & their importance. **(CMU:** May-22)
8. Mention how the lining epithelium of ureter prevent reabsorption of urine. **(CMU:** Nov-24)
9. Mention the venous drainage of anal canal along with its clinical importance.
10. What is imperforated anus? **(Nov-25)**

Kidney

1. Define nephron? Draw and label its parts **(CMU:**Nov-24, 22, May-19) (Ju-15). Factor responsible for ascend of kidney. (Ju-05, 06, 14, Ja-05, Nov-16)
2. Give the posterior (May-18)/ anterior relation (Nov-18) Inferior relation of left kidney. **(CMU:** Nov-20) (Nov-17) Draw & level the interior relation of bath kidney? **(May-25)**
3. Draw and label the coronal section of kidney. Give the anterior & posterior relation of right kidney. (Ja-07,10,12,13,15, Ju-10, 13, Nov-15, Ja-16)
4. Write about development of different parts of kidney. **(CMU:** Nov-22, 21, 20, 19) (Nov-16).
5. Give the congenital anomalies **(CMU:** Nov-20, 19) (May-19) of kidney.(Ju-15)
6. Give the structure of filtrating membrane of kidney. **(CMU:** Nov-20) (Ja-08, 15, Ju-10, 13, Ja-16)
7. Describe the blood supply of kidney (May-16).
8. Write down the development, blood supply and histological structure of adrenal gland? (Ja-09, May-15)
9. Draw and label the nephron? (May-17, Nov-18)
10. Write down the development of kidney in short. (Nov-17)
11. **Short note**: i) Polycystic kidney **(CMU:** May-21)
    ii) Enlarged prostate came difficulty in micturation (May-18)
12. Draw & label relations of anterior surface of right kidney. **(CMU:** May-23)
13. Justify why horse shoe kidney remains at lower lumber region. **(CMU: May-25)**

Liver & Gall Bladder

1. Define the different lobular structures of liver? Describe the blood supply of liver? **(CMU:** Nov-22, 21, 20, 19) (Ju-08, Ju-15)
2. Write down the support of liver. **(CMU:**Nov-22, 21, May-19) Give histology and development of liver. (Ja-07, Nov-15, 16) **(CMU:** Nov-24)
3. Draw the structure of hepatic lobules. **(Nov-25)**
   (CMU: Nov-22, 20, May-19) (Ju-06, 11, Ja-10,13, 14, Ju-15)
4. Give a flow chart showing the pathway **(Nov-25) (CMU:** Nov-22, May-20, 19) of bile from its site of formation up to its discharge into gut (with diagram). (Ja-10, Ju-12, May-15)
5. Give the right lateral relation of liver **(CMU:** May-23, Nov-20) with clinical importance. Name the bare area of liver with diagram.
   From which space needle biopsy of liver is done & why? **(CMU:** Nov-21) (May-15, 16)

CamScanner

6. Extra hepatic billiary apparatus? **(CMU:** May-23) (Ja-14, Ja-16, May-17, 18). Why pain of cholecystitis is felt in Rt. shoulder joint? **(CMU:** May-23) (Ju-14, Ja-15, Nov-16, 17)
7. Liver biopsy is taken from lower part of right lateral surface of liver (May-18) **(CMU:** Nov-22,19)
8. **S/N.** (i) Gall Bladder (Ju-15)
   (ii) Porta Hepatis (Nov-15, 18, May-17)
9. Explain why lower 1/3 of liver is chosen for liver biopsy? **(CMU:** May-23)
10. What is cholecystitis. **(CMU:** May-23)

Pancreas & Spleen

1. Write briefly the development **(CMU:** Nov-22,May-21, 20, 19) (May-15) blood supply & histological structure of pancreas.(Ju-03, Ja-08, May-16)
2. Histological structure of spleen (draw & level) **(CMU:** Nov-20, May-20)
3. Write blood supply of the head of pancreas from developmental background. **(CMU:** Nov-22,20) (Ju-12, 14) Whole pancreas artery supply. **(CMU:** Nov-23)
4. What is annular pancreas. **(CMU: Nov-24)** (May-16, 17)
5. Give the artery supply of head of the pancreas on developmental background (Nov.17)
6. **S/N:** Islets of langerhans (Nov-15,16 May-16)

Vermiform Appendix

1. What is McBurney's point with it's clinical importance? **(CMU:** Nov-21)
2. Mention the position and blood supply of vermiform appendix?
   (CMU: Nov-22, May-20, 19) (Ja-06, 07, 10, 11, 14, Ju-10,12, Ju-15, Nov-15)
3. a) Why pain of appendicitis starts at umbilicus (Nov-18) and radiate to right iliac fossa? (Ja-07,15, Ju-12,13, Nov-15, Ja-16)
   b) Why gangrene is more common in inflammed appendix & rare in inflammed gall bladder. (Ja-06)
4. Why pain of appendicitis 1st felt around the umbilicus and move to the night iliac Fossa? **(CMU:** May-23, 21 Nov-22) (Nov-16, May-19)
5. **S/N:** McBurney's point **(CMU:** Nov-20)
6. Write position of appendix with their parcentage? **(Nov-25)** **(CMU:** Nov-24)

Diaphragm

1. Name the major openings of diaphragm with their type & vertebral level. **(CMU:** Nov-22, 20) **(CMU:** May-20, 19) What are the structure pass through it. Give its nerve supply. **(CMU:** Nov-21) (Ju-06,14,Ja-13, May-15, Ju-15)
2. Explain nerve supply of the diaphragm from developmental background. **(CMU:** Nov-24, 22, May-22, 21, 20) (Ju-12, May-15, 16) & how it help on respiration? **(CMU:**Nov-23)
3. Why pain is felt in the tip of shoulder joint due to gas under the diaphragm ? (May-15)
4. What is hiatus hernia. **(CMU:**May-22) (May-16)
5. What is esophagial hernia? **(CMU:** May-20)
6. Attachment of diaphragm & why its sensory supply is different? **(CMU:** Nov-22, 21).
7. Mention the source of development of diaphragm. **(CMU:** May-23)
8. Effects if contraction of diaphragm in it major opening. **(CMU: May-24)**

Male & Female Genitalia

1. What are the supporting structures of uterus? **(May-25)** (May-15) Different parts **(CMU:** Nov-21) and blood supply of uterus. **(CMU:** May-24, Nov-22) (Ju-09, 06,10,12,13,14, Ja-10, 11, 16, May-18) Mode of artery supply. **(May-25)**
2. What do you mean by anteversion and anteflexion? What is Stratum functionalis? **(CMU:** May-23) (Ja-10,11, Ju-09,10) How they are maintained. (May-16, 17)
3. Write down the development, normal position **(CMU:** May-22, 21) main support **(CMU:** May-20) and congenital anomalies of uterus. (Ja-07, Ju-12, 14, May-17)
4. Draw & level histological structure of ovary. (Ja-06, 12, 15, Ju-07, 08, Nov-18) **(CMU:** Nov-22, May-20, 19)
5. Describe the development of testis with anomalies. How the head of the epididymis is formed?

CamScanner

(Ju-08, 11). Histology of testis **(CMU:** Nov-22, May-21) (Ja-05, 14, May-15, 16, 17) & uterus (Ja-06, Nov-18) Draw and level the histological structure of tastis. **(May-25)**

6. Pathway of sperm **(CMU:** Nov-21, 20, 19) from its site of formation up to its expulsion from the body. May-18, (Ju-10, Ja-10, 13,15, Ju-15, Nov-16, Ja-16). Mention the covering & content of spermatic cord.
7. **Short Notes:** a) Broad ligament (Ja-07, Ju-15 , Nov-15) b) Hypospadius **(CMU:** May-21) c) Vasectomy **(CMU:** Nov-21) (Ja-12) d) Pelvic diaphragm **(CMU:** Nov-21, 20)
8. Write layers of scrotum (Ju-13, Nov-15, 18) & its nerve supply. Explain-UTI is more (Nov-18) common in female (Ju-13, May-17). What is undescended testis? (Ja-15, Nov-16)
9. Ampulla of uterine tube-blood supply, development & clinical importance.(Ja-13, Ju-13)
10. Explain the development of Hypospadias. (May-15); **(CMU:** Nov-22)
11. Factors responsible for Descend testis (Nov-15, 17)
    Explain why undecent testis causes infertility **(CMU:** May-24)
12. What is the embryological basis of rectovaginal fistula. (May-16)
13. Trace the pathway of sperm. (Nov-17, 18)
14. Write down the parts length & developmental sources of the fallopian tube and artery supply fallopian tube. **(CMU:**Nov-22, 21, May-19) (Nov-17, May-19) **(Nov-25)**
15. Draw & label the transvense section of penis. **(CMU:** Nov-22, 20, May-19)
16. Importance of rectouterine pouch **(CMU:**May-19)
17. Name the normal positon of uterus **(CMU:** May-20, 19)
18. Mention the common site of ectopic pregnancy. **(CMU:** May-20)
19. Development of utenus. **(CMU:** May-21)
20. Draw & level the histological features of scenetory phase of utenus. **(CMU:** Nov-21)
21. Mention the primary support of uterous. **(CMU:** May-23)
22. Name the different type of cell in the testis with function of any two. & write venous drainage of testis . **(CMU:** May-24)
23. Why undecent testis causes infertility. **(CMU: May-24)**
24. Why femoral hernia is more common in female ? **(CMU:** May-24)
25. What are the lymphatic drainage of uterus.
26. What is the embryological basis of uterus didelphys?

Peritoneum

1. Explain anatomically/embryologically: greater omentum is called policemen of abdomen. (May-17, 16)
2. **S/N-** a) Hasselbach triangle.(Ja-03, 04) b) Urogenital diaphragm (May-18)

Nerve & Large Vessels of Gut

1. Define portal circulation. What are the sites of porto systemic anastomosis mention the veins participating in their formation. **(CMU:** Nov-23) (Ju-05, 06, 08, 09, 10, 12, 13, 14, Ja-08, 09, Ju-15, May-19)
2. Give the formation, termination, branches of abdominal aorta. **(CMU:**May-19) (Ju-05,08)
3. Draw and label the sacral plexus of nerve. Write the formation, course, area of innervations of pudendal nerve. (Ju-07)
4. **S/N-** a) Ventral branch of abdominal aorta.(Ja-13, 14)
   b) Portal vein (Nov-17)
5. How portal vein is formed? **(Nov-25)**

Anterior Abdominal Wall

1. What is rectus sheath **(CMU:** Nov-22, May-20,19) Write down the steps of dissection of anterior abdominal wall. Write about the formation of rectus sheath one inch above umbilicus. Diagram. **(CMU:**Nov-21, May-20) (Ja-13), mention its contents. **(May-25) (CMU:** Nov-22, 21, 19) (Ju-07, 10, Ja-06, 09, 10, 11, Ju-15)
2. Mention the difference between direct and indirect inguinal hernia. **(May-25) (CMU:** Nov-23, May-22, 21, 20, 19) (Ja-03,13, Ju-12,14, Ja-16)

CamScanner

3. **SN:** a) Inguinal canal (Nov-15) b) Caput medusae (Nov-16)
4. Write the formation & importance of Caput medusae. (Nov-16) Hasselbach's triangle formation & importance **(CMU:**May-21, Nov-19). (Ju-11,12)
5. Boundary and content of inguinal canal (Nov-16, May-19) Structure passing through it. **(CMU:**Nov-23)
6. Explain clinically and Anatomically pouch of doglus is clinically important (Nov.17)
7. How abdomen if divided into different region? **(CMU:**May -22, Nov- 19)
8. Deep inguinal ring (Nov-18)
9. Function of rectus abdominal muscle **(CMU:** May-21)

Inferior Extremity

Front of Thigh

1. Write the boundary and contents of femoral triangle. **(CMU:** May-24,22, 21, 20) (Ja-14, Nov-17) With diagram. **(Nov-25)**
2. How the femoral sheath is (M-18) formed? & its contents **(CMU:** Nov-22, 21) (May-16, 19) With diagram. **(May-25)**
3. Mention boundary and contents of adductor canal. **(Nov-25)** (Ja- 09, 10, 11, Ju-06, 09, Ju-15)
4. What is femoral ring? Why femoral hernia is common **(Nov-25) (CMU:** May-24, 22, 20, 19) (Nov-18) in female. (Ja-05, 08, 09,13, 14, Ju-12, May-15, Nov-15, May-17, Nov-18)
5. What is illiotibial tract? What are its function? (Ju-08, 13)
6. **S/N :** i) Femoral sheath (Ju-14) **(CMU:** Nov-19, May-21)
   ii) Deep inguinal ring (Ja-15, Ja-16, Nov-18)
   iii) Femoral hernia (Nov-17)
7. What structures are damaged in stab wound of apex of femoral triangle? **(Nov-25)**

Popliteal Fossa

1. Write down the boundary & contents of popliteal fossa. **(CMU:** Nov-23) (Nov-18, Ju-08,13, Ja-15, Ja-16, May-17, 19)

Artery & Veins of the Lower Limb

1. Write down the venous drainage of lower limb. What is varicose vein, How it develop in leg **(CMU:** May-22, 21) (Ju-14) and why varicose vein is more common in lower limb. **(CMU:**May-22, 21) (Ja-05, 06, 07, 09, 11, Ju-10, 13, Nov-16, May-15, 16, 19, Ja-16)
2. Factor maintaining the vanous return (May-18)
3. **S/N:** i) Arteria Dorsalis pedis
   ii) Great Shaphenous vein **(CMU:Nov-23)** (Ja-15, Ja-16, Nov-16, 18)
   iii) Superficial inguinal lymph mode (Ja-09)
   iv) Inguinal lymph node (Ja-16, May-17)
   v) Beginning & termination of popliteal artery **(Nov-23)**

Nerves and Nerve Plexus

1. Draw and label the lumbar plexus. (May-16, 19 Nov-17) Formation, course and area of innervations of obturator nerve. (Ja-05, 06, 07)
2. What is dermatome? Draw and label the dermatome of lower limb **(CMU:** Nov-24) (Nov-18), (Ju-07, Nov-16, 17, Ja-15) with sole & dorsum of foot.(Ju-07, May-15, Ja-16)
3. Name muscles of different compartment of thigh with their nerve supply & action. **(CMU:**May-19)
4. Foot drop (May-17)
5. Enumerate the area of innervation of femoral nerve (May-19)
6. Name muscle of different compartment of leg with nerve supply in tabulated form. **(CMU:**Nov-21)

CamScanner

7. Dermatome of leg. **(CMU: Nov-21)**
8. What is talipes equinoverus. **(CMU: May-24)**

Bones, Joints and Muscle

1. Name the movements of hip joint with the muscles involved. How the stability of the hip joint maintained? Name the muscle causing flexion & extension of hip joint. With their nerve suppl **(May-25) (CMU:** Nov-22, 21, 20) Hip joint is stable joint- explain. (Ju-14, May-15) Mention th formation, type and movement of ankle joint. (Nov-16) with muscle involved **(CMU:** Nov-23)
2. Give the composition of the knee joint. Intra capsular structure of the knee joint. **(CMU:** Nov-2((Ju-12, Ja-14, May-15) Arterial anastomosis around it? (Ja-06, 08, Ju-11)
3. What are the muscles that causing evertion of foot **(CMU:** May-19) with their nerve suppl **(CMU:** Nov-24) (Ju-10, May-15, Ju-15, Nov-15, 16, 17, 18).
4. Names the muscles causing flexion, extension, Inversion of foot **(CMU:**Nov-23,May-22, 21, 19) wit nerve supply **(CMU:** May-22, 21, Nov-20) (Ju-13, Ja-14, May-18)
5. Classify arches of foot. **(May-25)** Formation, maintenance and function of arch of foot **(CMU** Nov-23, 22, 20, 19, May-22, 21) (Ja-05, 12, Ju-11, 13) Medial longitudinal arch of foot. **(May 25) (CMU:** May-23) (Ja-15, Nov-15, May-16, 17) How is lateral longitudinal arch of foot maintained and form. **(CMU:** May-24) Functions of arches of foot. **(May-25)**
6. Mention two congenital anomalies of foot. (Ja-08, 11, 14, Ju-12, 13, Ja-07, 12, Ja-16, May-17)
7. Write the muscles of different compartment of leg with contained nerve in a tabulated form **(CMU:** May-19) Muscle of anterior compartment of thigh with nerve supply **(CMU:**Nov-23)
8. **Write the origin, insertion and nerve supply of followings-**
   a) Gluteus maximus. (Ju-07, Ju-15) **(CMU:** Nov-20, May-19)
   b) Hamstring muscle.(Ja-02,05)
   c) Different compartment of leg.(Ju-06,07, Ja-09,13, 14)
   d) Anterior compartment of leg (Ju-15)
   e) Adductor Magnus. **(CMU:**May-20)
   f) Soleus. **(CMU:**May-20)
9. Name the hamstring group of muscle with their attachments and nerve supply in a tabulated from (May-16, 17) and their characteristrics and acton. **(Nov-25)**
10. **SN:-** a) Tendo Achillis (Nov-15, May-18, 19)
    b) Foot drop Definition **(CMU:** May-21, Nov-19) (Ju-06,07, Ja-07,09, May-16, 19)
    c) Locking & unlocking. **(CMU:** Nov-22, 21) Ju-11,Ja-12,13)
    d) Peripheral heart. **(CMU:**Nov-23) (Ja-13, Nov-15, May-16, 18)
    e) Adductor tubercle **(CMU:** Nov-20, May-19)
11. Why soleus muscle is called peripheral heart. **(CMU:** May-21, Nov-22)
12. How longitudinal arch of foot is formed (use diagram) **(CMU:**Nov-21)
13. Name the muscle taking part inflexion of knee joint with their nerve supply. **(CMU:**Nov-22)
14. List muscles of lateral compartment of leg with their nerve supply function. **(CMU:** May-23)
15. Explain why foot drop occurs in fracture neck of fibula. **(CMU:** May-23)
16. Mention the formation of medial longitudinal arch of foot. How this arch is maintained? **(May-25) (CMU:** May-23)
17. What is meant by club foot? **(CMU: May-25)**

Systemic Embryology

Abdomen

1. Write down the development of stomach and lesser sac of peritoneum. (Ja-05, Ju-08)
2. Mention the developmental source of different cells of testis. (Ja-05, Ju-11) Factor responsible for descend of testis. (Ju-10,11)
3. Write briefly about undescended testis. (Ja-06, 08,13 Ju-10,11,)
4. Explain how an imperforted anus may develop. (Ja-05, 12, Ju-11)
5. Write down the development and congenital anomalies of pancreas. (Ju-12,14)
6. Write down the development of duodenum. (Ju-05, Ja-09)
7. Write ectopic pregnancy with diagram of normal sites.What is vasectomy?(Ju-12)
8. From where parenchyma of liver developed? (Ja-07,13)
9. What is cloaca Write the fate of cloaca in both sex. (Ju-11)
10. Write down development of diaphragm. (Ja-13) What is hiatus hernia? (Ju-14)
11. Write the development, blood supply & clinical importance of uterine tube. (Ju-11)
12. Blood supply of transverse colon from developmental background. (Ju-11)
13. Mention the derivatives of cloaca. (Ju-11)
14. How congenital inguinal hernias develop? (Ju-14)
15. How polycystic kidney develops? (Ju-14)
16. Person with undescended testes are infertile (Ja-16)
17. Mention the derivatives of paramesonephric duct in both male & female. **(CMU:** May-23)

হে ঈমানদারগণ! আমি কি তোমাদেরকে এমন একটি ব্যবসায়ের সন্ধান দেব,
যা তোমাদের কষ্টদায়ক আযাব থেকে মুক্তি দিবে? তোমরা আল-াহ ও রাসূলের উপর ঈমান আন এবং
আল-াহর পথে অর্থ-সম্পদ ও জান-প্রাণ দিয়ে জিহাদ কর।
এটাই তোমাদের জন্য অতীব কল্যাণকর। যদি তোমরা তা জান।
-আল কুরআন (৬১:১০-১১)

THORAX

Mediastinum

1. Define mediastinum (**May-25**) (**CMU: May-24,** Nov-22, 21) (May-18, Nov-17, 18).
2. Boundary & contents of posterior mediastinum
   (**CMU: May-24**,22,19, Nov-22) (Nov-18,May-17).
3. What is mediastinal syndrome? (**May-25**)
   (**CMU:** May-24, Nov-22, 21) (Ju-11,13 Ja-12,15,16, Nov-15,16,17) (Nov-18, May-16, 19)
4. Boundary & contents of superior mediastinum. (**Nov-25**) (**CMU:** Nov-21) (Ja-10, 11,Nov-17, May-19)
5. How mediastinum is divided into different parts? (**May-25**) (**CMU:** Nov-20, 19) (Ju-11, May-18)
6. S/N- Middle Mediastinum. (**CMU:** Nov-20)
7. Part of mediastinum (diagram) (**CMU:** Nov-22, 21).

Heart

1. Name the support of the heart. (**CMU:**Nov-21, May-20, May-19) (Ju-11,12, Ju-15)
2. a) Discuss the artery supply of heart. (**CMU:** Nov-22, May-22,20,19) (Ja-05, 08.Ju-11)
   b) Write briefly the right/Left coronary artery (area of supply).
   (**CMU: Nov-24, May-22**) (Ju-06,10,14 Ja-12)
   What is coronary sulcus and with its contents. (**CMU:**Nov-21, 19) (Ju-07, Ja-14, Ju-15)
3. Give the venous drainage of heart. (**CMU:** Nov-22, 21, 20) (**CMU:**May-19)
   (Ja-07, 08, 14 Ju-06, 07, 12, May-15, Nov-16)
4. Write briefly interior of right atrium with diagram. (**Nov-25**)
   (**CMU:** May-23) (Ja-06, 09, 11, Ju-07, 10, Nov-15) (Nov-18)
5. Name the parts of conducting system of heart (May-19). Write down the position of S.A node. (Ju-07, 09, 14 Ja-13, Nov-15) Draw and level the conductive system of heart (May-18)
   Draw & label the base of heart. (May-16)
6. Write down the origin, course, and distribution of left coronary artery (**Nov-25**) (**CMU:** Nov 23.21) (Ja-16, Nov-16). Write down the tributaries of right atrium. (Ja-15, May-17)
   Name the baunch of left coronery artery and distribution with diagram. (**Nov-25**)
7. Write down the parts and development of interventricular septum/interarterial Septum. (**CMU:**May-22) (Nov-17) with diagram (**May-25**)
8. Wall of left ventricle is thicker than the right ventricle (May-18) (**May-25**)
9. Name the openings in right atrium (**CMU:** Nov-20). How apex of heart if formed (**CMU:**May-19)
10. How base of the heart is formed and what is its vertebral level. (**CMU:**Nov-19)
11. Draw & label histological feature of cardiac muscle. (**CMU:**May-20)
12. Mention the changes of fetal circulation after birth. (**CMU:** Nov-22, May-22, 20)
13. Name of parts of primitive loop of heart with diagram. (**CMU: Nov-24, May-22, 21, 20**)
14. **SN:**
    a) Papillary muscle (May-18)
    b) Tetralogy of fallot (**CMU:** Nov-20, May-20) (Ja-05,08,09,12,15, Ju-05,10, May-15, 16, 17)
    c) Base of the heart. (Ju-04, Nov-15)
    d) Write large openings of right atrium? Which ventricular wall is thicker & why? (Ja-05, 13, 15, Ju-15)
    e) SA node (**CMU: Nov-24**) (Ja-15, Ja-16, Nov-16, 17, 18)
    f) Pericardium (Ju-14, Nov-15) (**CMU:** May-22, 21, Nov-19)

CamScanner

Transverse sinus of pericardium (May-18)

g) Arch of aorta. (Ju-15)
h) Coronary sinus. (Nov-15, May-16, 17)
i) Coronary Sulcus. **(CMU: Nov-20)**

15. What is dextrocardia? **(CMU-22).**
16. Mention congenial Anomalies of heart. **(CMU: Nov-21)**
17. Content of aortic orifice **(CMU: Nov-22)**
18. Developmentally the smooth & rough part of right atrium. **(CMU: Nov-22, May-22)**
19. Why coronary arteries are called functional end artery. **(CMU:Nov-23)**
20. What is meant by right coronary dominance? **(Nov-25)**

Lung & Pleura

1. Write down the parts, nerve supply and development of Parietal pleura. **(CMU: Nov-24, 23, May-23**, 22, 21, 20, 19), blood supply (May-19) of pleura (May-17) Name the pleural recess with functional significance (Ju-13)
2. What are the sites of aspiration of pleural effusion? **(CMU: May-23)** Explain why this site is chosen. **(CMU: May-23,** 20) (Ja-08,10, Ju-07, 09, 11, 12, 14, May-15, Nov-15)
   Mention the sructures that will be pierced by a needle during flexural fluid aspiration. **(May-25)**
3. What is costodiaphrag matic recas. **(May-25)** Mention the boundary and clinical importance of costodiaphragmatic recess.
   (CMU:Nov-23, 21, May-21,19) (Ju-09, 10, 14, Ja-10, 07, 08, 11, 14, Ja-16, Nov-16, Nov-18)
4. Draw and label the pulmonary unit. **(Nv-25) (CMU:** Nov-24, 23, 22, 21, May-20)
5. Define bronchopulmonary segment Draw & label the broncho pulmonary segment of right **(May-25)** (Nov-23, 18) and left lung **(Nov-25) (CMU:** May-24, 23, 22, 21, 20, 19) (Nov-17, May-19) with its clinical importance.
   (Ju-10,13,14, Ja-10,11,12,13,15,16 Nov-15, 16, May-16, 17)
6. Explain broncho pulmonary segments are not broncho vascular units.
   (CMU: May-24, 22, 21, 19) (Ju-07, 08, 11, 14, May-16, 17) Why infection is more common in apical segmental of the lower lobe and posterior segment of upper lobe. **(CMU:** May-24)
7. Blood supply of lung. **(CMU:**Nov-22, May-21, 19) (Ju-11, May-19), on functional bass **(Nov-23)** according the zone (May-18)
8. Write the functional division of lungs **(CMU:**Nov-22, 21, May-19) (Ja-14)
9. Why Infections are common in right lung than the left lung- explain. **(Nov-25)**
   (CMU: Nov-22, May-21, 20,19) (Ja-15, Ja-16, Nov-17, 18, May-19)
10. Viable age of a foetus is 7 month explain? (May-15)
11. Difference between right and left principal bronchus. (Nov-16)
12. Explain anatomically- Lung alveoli is lined by simple squamous epithelium.
    Terminal from chiole is lined by ciliated columner epithelium.
13. Draw and label histological structure of trachea. **(CMU:**May-20)
14. **SN:**
    a) Pulmonary unit (May-15, Ju-15, Nov-18)/Respiratory unit. (Ju-11, Ja-14)
    b) Name the functional division of lung **(CMU:** Nov-21, 20) & with their blood supply. **(CMU:** Nov-21) (Ju-11, 12, Ju-15, Nov-15, May-8)
    c) Respiratory membrane. (Ju-14, May-15, Ja-16, May-18) RDS (May-18)
    d) Supra pleural membrane. **(CMU:** Nov-21)

CamScanner

15. What is tracheaoesophageal-fistula? (CMU: May-22)
16. Compare adult lung with fetal lung by three points. (CMU: May-23)
17. Compare the parietal and visceral pleura by three paints. (May-25)
18. Write the attachment & importance of suprapleural membrance. (May-25)

Diaphragm

1. Write down the origin and development of diaphragm. Enumerate the structure passing through oesophageal opening of diaphragm. (CMU: May-24)
2. Write down the major opening of diaphragm with vertetral level. (Nov-25)

Wall of the Thorax

1. Draw & lable: Give the boundary and content of typical intercostal space. (CMU: May-23, Nov-23, May-22, 21, 20, 19) (Ju-15, Ja-16, Nov-17,18, May-19)
2. Write the venous drainage of posterior thoracic wall. (CMU: May-22, 21, 20,19) (Ja-07,14,15, Ju-11,12, May-17) (Nov-25)
3. Draw and label typical spinal nerve. How and where the spinal nerve is formed? Write down branches and area of innervations. (Ja-06, 07, 10,13, May-15, Ja-16)
4. Write the definition, formation, course, branches and distributing components of intercostals nerve. Give the functional components of intercostal nerve. (ja-06, 07, Ju-09, 11)
5. Explain anatomically/developmentally-why there is pain in shoulder tip due to irritation of diaphragm. (Ja-08)
6. Draw & label a typical intercostal space.
7. Why left recurrent laryngeal nerve is longer than the right (May-17)
8. Name the structures related to neck of first rib (CMU:May-19)
9. What is intercostal nerve. (CMU:May-21, 19) Draw and level (CMU: Nov-23, May-23)
10. S/N: a) Thoracic duct (Ja-06, May-16, 17, 18)
    b) Costo diaphragmatic recess (CMU:May-22, 20) (Ju-05, 09)
    c) Intercostal nerve (May-17)
    d) Mediastinal syndrome (Ja-05)
11. What is intercostal neuralgia? (CMU: May-23)
12. Why any incision through intercostal space is kept close to upper border? (CMU: May-23)
13. Write about thorasic duct with diagram. (CMU: Nov-25)

Systemic Embryology

Thorax

1. Name the parts of primitive heart loop. (CMU:May-20) Mention the derivatives of its different parts. (Ju-06, 11, Ja-08)
3. Development of interatrial septum with diagram, (CMU:May-21, 19) (Ja-07,12, Ju-14, May-19) & its congenital anomalies. (Ju-12, 13, May-15, Ja-16)
6. Name the congenital anomalies of the heart. (Ja-05, 09,Ju-12, May-19) (CMU:Nov-19)
7. Write the stage of lung development. (Ja-05, 06, Ju-11,12)
8. Draw and Label the fetal circulation. Mention the changes that take place in the circulating system at birth. (CMU: May-23, 20) (Ja-05, Ju-08,10,11,14, May-15, 19)
9. Give the development and congenital anomalies of diaphragm. (Ju-06, 08, May-16)
10. SN: a) Development of SVC. (Ju-06, 07, May-16)
    b) Fallot's tetralogy. (Ja-08, 12)
11. Explain: Lung alveoli contain simple squamous epithelium (May-19)

দ্বীনের মূল হল ইসলাম, সুতরাং যে ইসলাম গ্রহণ করবে সে নিরাপত্তা লাভ করবে, খুঁটি হলো সালাত
এবং তার সর্বোচ্চ চূড়া হলো আল্লাহর পথে জিহাদ। -আল হাদীস

CamScanner

Superior Extremity

The Axilla & Breast

1. Write down the histological structure, blood supply, lymphatic drainage (May-15, 16, 17) and clinical importance of female breast. **(Nov-25)** (Ju-07,08,14)
2. Axillary lymph nodes are clinically important why? (Ju-13, Ja-15,16, Nov-16, 17, 18)
3. Give an outline of lymphatic drainage of skin overlying female breast. **(CMU:** Nov-24, May-23)
4. How mammary bed is formed? What is axillary tail? **(CMU:** May-23)
5. Write boundary and content of axilla. (CMU: May-24)
6. Where does the apical group of axillary lymph node drains. **(CMU:** May-24)
7. Write the lymphatic drainage of mammary gland. **(Nov-25)**

The Fossa

1. Give the steps of dissection and boundaries with contents of cubital fossa. **(May-25)** **(CMU:** Nov-24,23,22, 19) **(CMU:** May-20) (Ju-09, Ja-12, Ju-15, Nov-15, 16, 17, 18)
2. What are clinical importance of median cubital vein? **(CMU:** Nov-23, May-22, 20) (Ju-07,13, Ja-09,15, Nov-18)
3. Write down clavipectoral fossa? **(CMU: Nov-24)**

Arteries, Veins & Lymphatic Drainage

1. Write down the arterial anastomosis around elbow joint. (Ju-03)
2. Venous drainage of upper limb. (Ju-05, 06, Ja-09, May-18)
3. What is the importance **(CMU:**May-21) (May-16) of median cubital vein. What is varicose vein (Ju-05, 06)
4. **S/N:**
   a) Median cubital vein (Nov-15, Ja-16, May-17) **(CMU:**May-19)
   b) Auxillary artery (Ja-16, Nov-17, 18)
5. Which superficial vein of upper limb is prefered for blood sample collection & why? **(CMU:** May-23) Median cubital vein ismat preferred for venipuneture explane anatomically.
6. Give the extent and branches of axillary artery. **(CMU: May-25)**

Nerves & Nerve Plexus

1. **Explain anatomically-**
   a) Injury of the upper trunk of brachial plexus causes adducted medially rotated arm & extended pronated fore arm.
   b) Right lung is more prone to infection (Ju-13).
   c) In fracture of surgical neck of humerus, abduction of surgical neck is not possible.(Ju-12)
   d) Erb's paralysis **(CMU:**May-21, 20) (Ju-09,13, Ja-15, Ja-16, May-18)
2. Define dermatome. Draw and lable the dermatome of upper limb of flexor aspect. **(CMU: May-**24, 23, 20) (Ja-13,14, Ju-12, May-15, 17, 18, Nov-15, May-19)
   Whats is Ishemic contracture **(CMU:** May-24)
3. Draw and label the dermatome of hand. **(CMU:** Nov-23, May-22,21,20) How upper limb get autonomic innervation. (Ju-10, 11 Ja-05, 08, 11, 12)

CamScanner

4. Draw and label brachial plexus. **(May-25)** (Ju-14, Nov-15, 16, 17, 18, Ja-16, May-19) Show it various parts. **(May-25)** How it is formed? **(CMU:** May-19) Mention its medial cord **(CMU** Nov-23)
5. What do you mean by pre-fix and post-fix (May-17, 18, 19). Mention the features of ulnar ner injury. (Ju-05, 10, 13, Ja-08, 10, 11)
6. Draw and label the cutaneous supply of hand/ dermatome (Ja-07+, Ju-08,14, May-16)
7. Explane What is winging of scapula? (Ju-14) **(CMU:** May-22) **(May-25)**
8. What is Erb's paralysis **(CMU:**May-22, 20, 19) (May-19)
9. Distribution of ulner nerve, effect of injury to this nerve **(CMU:** Nov-23)

Muscles

1. **Give the attachment, nerve supply, action of the following muscle:**
   a) Deltoid (Ja-12,14,15, Ju-10,12,13, Ju-15, Nov-18)
   b) Pectoralis major (Ju-08, Ja-12)
   c) Triceps brachi (Ja-12, Nov-16)
   d) Biceps brachi (Ja-05, 07,13, 14 Ju-07, Ju-15, May-16, 17, 19, Nov-17)
   e) Lumbricals (Ja-05, Ju-07, 09, 11)
   f) Flexor digitorum profundus, flexor digitorum superficialis. (Ju-06,12, Ja-09,13, 14, Ju-15)
   g) Brachialis (Ju-07, 08, 11, 12, Ja-09, 13, Ja-16)
   h) Supinator, serratus anterior (Ju-05, Ja-09)
   i) Muscle of hand.(Ju-05,07)
   j) Supination (May-17)
   k) Superficial palmar **(CMU:** May-22)
2. Name the thenarmuscle with their nerve supply. **(May-25)**

Bones & Joints

1. Formation of shoulder joint, factors maintaining the stability of the joint. Muscles producin different movements of it. **(May-25)** What is bursa? **(CMU:** May-23) (Ja-06, Ju-14)
2. Write down the formation and importance of rotator cuff. **(CMU: May-25)** **(CMU** : May-21, 20 19)
   (Ju-07, 08, Ja-12, May-15, 16, 18, 19, Ju-15)
3. Define supination of forearm? Name the muscles causing pronation & supination **(CMU:**May 21, 20,19) of forearm **(CMU:** Nov-22, 21) with nerve supply, origin & insertion.
   (Ja-08, 10, 11, 12, 14, May-15, Nov-15)
4. Name muscle involved in abduction of shoulder joint of arm **(CMU:** Nov-22, 21,19 **(CMU:**May-20) with their nerve supply. **(CMU:**Nov-21) (Ju-11, 14, Ja-16, May-17)
5. Name muscles involved in flexion & extension of elbow joint with their nerve supply. **(Nov-25)** (Ju-11, Ju-15) write down type and articular suraces of elbow joint. **(Nov-25)**
6. What are the intracapsuler structures of shoulder joint? Why dislocation is common in this joint **(Nov-25)** (Ju-14, May-15,18, 19, Nov-16)
7. Write down clumpke's paralysis. (Nov-16)
8. Write about clavipectoral fascia. (Nov-16)
9. Name the muscles taking part in supination and pronation. **(CMU:**May-20)
10. **SN:** a) Wrist drop **(CMU:**Nov-22, 21, 19, May-21, 20)
    (Ja-09, 12, 13, 14 Ju-11, May-15,19, Nov-15, Ja-16)
    b) Carpal tunnel syndrome **(CMU:**Nov-22, 21, 19, May-20)
    (Ju-08, 11, 14, Ja-14, May-15, 16 Nov-15, May-17)
    c) Palmar aponeurosis (Ja-05, Ju-03, 06)

CamScanner

d) Colle's fracture.**(May-25)(CMU:**May-20, Nov-22)(Ju-10,13, Ja-15, Nov-16, May-18)
e) Muscles of anterior compartment of arm. (May-15)
f) Clavicle is a modified long bone. (May-16, 19)
g)Rotattor cuff. **(CMU:**May-20)
h)What is claw hand. **(CMU:**Nov-21)

11. What is rotator cuff & how it is formed? **(CMU:** May-23) and it's importance. **(Nov-25)**
12. Why shoulder joint is unstable ? **(CMU:** May-23)
13. What is carrying angle? **(Nov-25)**

Problem Based Questions (PBQ)

Embriology

01. A 15 years old girl was brought to a physician with the complaints of failing to enter puberty like no sign of breast development or menstruation. On examination it is found the girl has webbed neck, lymphedema of the extremities, skeletal deformities, broad chest with widely spaced nipples. The karyotype of the girl was 45 XO monosomy and diagnosed as Turner Syndrome.

Answer the following questions from the above scenario.

a) What type of abnormality is this? **Diagnosis : Turner Syndrome.**
b) What is the cause of such karyotype?
c) Whether the girl contains any barr body or not?

(CMU: May-25)

02.A 26 weeks gravid woman visited gynae OPD for regular antenatal checkup. On examination the doctor found more abdominal circumference of mother than the age of gestation. Her investigation report revealed high serum alpha fetoprotein, Ultrasonogram showed absence of cranial vault of baby. The doctor diagnosed the case as anencephaly.

a) What type of defect is it? **Diagnosis : Neural tube defect**
b) Mention its embryological background.
c) How can it be prevented?

(CMU: Nov-25)

03. A pregnant woman did an ultrasound examination according to the advice of her consultant during her routine checkup at 7 months of gestation. Ultrasound reveals excessive luid accumulation in the amniotic cavity.

a) What is this condition called?
b) Mention two causes of this condition
c) Mention the function of amniotic fluid.

(CMU: May-24)

Diagnosis: Polyhydramnios.

04. A 27-year-old married female brought to the emergency department with the hintory of a sharp intense pain in the lower abdomen, vaginal bleeding and history of amenortiea for 1 and half month. On physical examination there was rapid pulse, cold clammy skin, reduced urine output. Ulrasonegraphy of lower abdomen reveals empty uterine cavity and non-visualization of right uterine tube.

a) What is the condition called?
b) Which hormone primarily responsible for maintaining the condition?
c) What is the reason of empty uterine cavity?

(CMU: Nov-24)

Diagnosis: Ruptured ectopic pregnancy.

05. A 20-year-old pregnant female visited to her physician for ante natal checkup at 20th week of gestation. On routine ultrasonography it was revealed that a midline mass which contains part of small intestine and covered by a thin membrane.

a) What is the clinical condition? **Diagnosis:** Omphalocele.

CamScanner

ANATOMY

Structural Essay Questions (SEQ)

01. Differentiate between epithelial tissue and connective tissue. Classify glands according to development with an example of each. Mention the structure and functions of two connective tissue cells (use diagram). **(CMU: May-25)**

02. Classify intraembryonic mesoderm with one derivatives of each. Justify epiblast is the source of all three germ layers. Mention four neural crest derivatives. What is the importance of somite? **(CMU: May-25)**

03. Draw and label the layers of scalp. Which one of it is dangerous layers and why? How black eye develop? Differentiate between emissary vein and diploie vein. **(CMU: May-25)**

04. Draw and label the super lateral surface of the cerebrum showing important sulci, gyri functional area with Brodman number. Enlist the different types of fibers of cerebrum with an example of each. Mention the functions of primary motor area, visual association area. **(CMU: May-25)**

05. Classify the organelles of a cell. Differentiate between organelle and inclusion of cells. Write down the structure and functions of two organelles of a cell (use diagram). Which organelle is called suicidal bag and why? **(CMU: Nov-25)**

06. Write down the morphological classification of bone with examples of each. Mention the parts of a growing long bone Draw and label the historical structure of a compact bone. Mention the bone cells with function. **(CMU: Nov-25)**

07. Draw and label the superolateral surface of the cerebrum hemisphere showing important functional areas with their Brodmann's area number. Mention the blood supply of super lateral surfaces. What is the blood brain barrier, mention its importance? **(CMU: Nov-25)**

08. Classify laryngeal cartilage with histological type. Draw and label interior of larynx. Mention the nerve supply of the larynx. Why is the larynx called a voice box? **(CMU: Nov-25)**

09. Classify the arches of foot. Mention the formation of medical longitudinal arch. Name the factors maintaining this arch? Write 4 functions of arches of foot. What is meant by club foot? **(CMU: May-25)**

10. Write down the supports of uterus. Give the made of arterial supply of uterus. Write the lymphatic drainage of uterus. What is the embryological basis of uterus didephys? **(CMU: May-25)**

11. Mention the articular surface of shoulder. Write down the various movements seen in shoulder joint with muscles involved in a tabulated form. Give the formation of rotator cuff. Why shoulder joint is commonly dislocated joint? **(CMU: May-25)**

12. Compare the partal and visceral pleura by three points. What is cost diaphragmatic recess and its importance? Write the attachment and importance of suprapleural membrane. Mention structures that will be pierced by a needle during pleural fluid aspiration. **(CMU: May-25)**

13. Mention the boundaries and contents of femoral triangle along with diagram. How the femoral shealth is formed? Why femoral hemia is more common in females? With structures are damaged in stab wound of apex of femoral triangle? **(CMU: Nov-25)**

14. Mention the various positions of appendix. Give the arterial supply of transverse colon on development basis. Write the embryological basis of congenital megacolon. State 4 difference between small and large intestine. **(CMU: Nov-25)**

15. Write down type and articular surface of elbow joint. Mention the movements of elbow joint with muscle producing them and their nerve supply. Median cubital vein is most preferred for venipuncture-explain anatomically. What is carrying angle? **(CMU: Nov-25)**

16. Mention the origin and the course of left coronary artery. Name the branches and area of distribution of left coronary artery with diagram. What is meant by right coronary dominance? Coronary arteries are functional end arteries. Justify. **(CMU: Nov-25)**

17. What are the connective tissue cells?
Write down the characteristic features of connective tissue. Explain how connective tissue is involved in defense mechanisms and gives support to the body? **(CMU: May-24)**

18. Write down the formation, function of placenta (use diagram). Why is the placental barrier is not a true barrier? **(CMU: May-24)**

19. Mention the function of cerebellum. Name the intracerebellar nuelei. Mention two cerebellar dysfunction with features. **(CMU: May-24)**

CamScanner

20. Classify laryngeal cartilage with histological type. How larynx protects the airway from food an drink? Mention the nerve supply of larynx. **(CMU: May-24)**
21. Classify bone morphologically with example. What are the bone cells mentioning their function Mention the clinical importance of metaphysis. Write down the function of periosteum. **(CMU: Nov-24)**
22. Mention the site, result and phase of fertilization. Mention the normal and abnormal sites implantation. **(CMU: Nov-24)**
23. Mention the sulci, gyri, functional area, arterial supply, effect of lesion of frontal lobe of cerebru (use diagram). Mention the function of prefrontal cortex. **(CMU: Nov-24)**
24. Name the paranasal air sinuses with their location and opening. Which one is the largest of them Why maxillary sinusitis is common? Mention the function and lining epithelium of paranasal a sinuses. **(CMU: Nov-24)**
25. Draw & label relations of anterior surface of left kidney. Write down process of development c kidney. Where along the ureter is a calculus most likely to become lodged? Why urinary bladde lined by transitional epithelium? **(CMU: May-24)**
26. Write down the superficial veins of lower limb with their origin, course and termination. Mentio the clinical importance of great saphenous vein. Why are the veins of lower limb prone t varicosity? Write in short about peripheral heart. **(CMU: May-24)**
27. Describe in short the interior of the right atrium of heart (use diagram). Write down th origin an distribution of right coronary artery. Write in short about transverse sinus. What do you mean b cardiac dominance? **(CMU: May-24)**
28. Give the formation of shoulder joint. Mention the sequence of muscle involvement in abduction o shoulder joint above head. Which type of dislocation is common and why? How is the stability o the joint maintained? **(CMU: May-24)**
29. Draw and label different parts of stomach. Mention its lymphatic drainage (use diagram). Why i peptic ulcer commonly occurting along the lesser curvature? Mention function of different cells o a gastric gland. **(CMU: Nov- 24)**
30. Write down the boundaries and contents of popliteal fossa (use diagram). Name the hamstrin muscles with their common characteristics. Which muscle acts as a peripheral heart and why? **(CMU: Nov-24)**
31. Draw and label the bronchopulmonary segments of right lung. How the segments are separate from each other anatomically? Mention the arterial supply of different zones of bronchial tre mentioning their source. Mention the lymiphatic drainage of lung. **CMU: Nov-24)**
32. What do you mean by prefixed and post fixed types of brachial plexus? Draw and label the brachi plexus. What is Erb's palsy? Why injury to upper trunk of the brachial plexus causes adducted an medial rotated arm and extended & protated forearm? **(CMU: Nov-24)**
